

## 15-Passenger Van Safety Quiz

1. Vans respond differently from regular passenger vehicles because they:
  - a. Do not accelerate as rapidly
  - b. Do not stop as rapidly
  - c. May swerve if stopped rapidly
  - d. All of the above
2. A federal agency that has published two safety advisories on the use and operation of a 15-passenger van is the:
  - a. Department of Motor Vehicles (DMV)
  - b. National Highway Transportation Safety Administration (NHTSA)
  - c. National Highway Safety Board (NHSB)
  - d. Occupational Safety and Health Administration (OSHA)
3. According to NHTSA, 15-passenger vans carrying 10 or more occupants have rollover rates that are \_\_\_\_\_ times the rollover rate of lightly loaded (5 or fewer passengers) 15-passenger vans.
  - a. One
  - b. Two
  - c. Three
  - d. Four
4. Always load vans:
  - a. Front to back
  - b. Back to Front
  - c. With luggage safely stored on the roof
  - d. So that everything fits snugly and doesn't roll around
5. Proper vehicle maintenance is critical to the safe operation of the 15-passenger van. Before each day's trip, always check:
  - a. Windshield wipers and fluid
  - b. Tire pressure and tread
  - c. Seatbelts to ensure they are operating
  - d. All of the above
6. The two factors that are most likely to cause a rollover are:
  - a. Driver inexperience and curvy roads
  - b. Driver inexperience and cargo on the roof
  - c. Cargo on the roof and high occupancy loading
  - d. Speed and high occupancy loading

7. According to NHTSA, 80% of those killed in single vehicle rollovers did not:
  - a. Lock doors
  - b. Wear seatbelts
  - c. Use sun visors
  - d. Dress appropriately
8. Drivers should use \_\_\_\_\_ when backing a 15-passenger van.
  - a. A spotter
  - b. Extreme caution
  - c. Side and rear view mirrors
  - d. All of the above
9. Drivers should know where the \_\_\_\_\_ of the vehicle are before they take a 15-passenger van on a trip.
  - a. High beams
  - b. Hazard lights
  - c. Blind spots
  - d. Door locks
10. Van drivers should take rest stops approximately every \_\_\_\_\_ hours.
  - a. Two
  - b. Three
  - c. Four
  - d. Five
11. The manufacturer's information on correct tire pressure is located:
  - a. On the tire itself
  - b. On the driver's sun visor
  - c. On the driver's door edge, the door post, on the glove box door
  - d. On the steering column
12. Drivers of 15-passenger vans should avoid:
  - a. Making sudden lane changes
  - b. Taking frequent rest breaks
  - c. Wearing a seatbelt
  - d. Loading the van from front to back
13. Drivers may use a cellular phone:
  - a. Whenever they are driving
  - b. Only during an emergency
  - c. Never while driving
  - d. If driving less than 35 mph

14. Tire pressure:

- a. Can be checked visually
- b. Must be checked with a tire pressure gauge
- c. Does not affect how the van responds to the actions of the driver
- d. Remains the same over time

15. 15-passenger vans must not be driven:

- a. Over 55 mph
- b. On toll roads
- c. Over 400 miles round trip
- d. Outside the country
